## Chairman's Message

India has made significant progress in terms of increasing primary education and there has been a substantial growth in the enrollment percentage in the higher education sector. India's improved education system is often cited as the main contributors to its economic development. Heritage Group of Institutions has made impressive growth setting a benchmark in the world class education systems around the globe. I congratulate Ms. Ananya Maity for securing 99.5% in ISC results 2017 thus becoming a National Topper (1st in the country). We, at Heritage, believe that the best should be offered to the students so that they can excel in their respective fields of study and contribute significantly towards nation building. During this quarter, Heritage Institute of Technology received the prestigious NAAC accreditation with a grade of B++ in the first cycle. Moreover, the Institute received an Award from MAKAUT for Best Research Project among 80 private engineering colleges across the State. Heritage Institute of Technology crossed a successful milestone by having the highest number of medal winners between 2012-2016 during the 8th Convocation of MAKAUT.

To celebrate the impressive growth in education, and to acknowledge the contribution of the members of the Heritage family, who have completed over 10 years of service in creating a centre of excellence in this part of the country, Kalyan Bharti Trust organized a felicitation ceremony to honour 225 of its members, staff and employees. We have concrete future plans to establish a Medical College, a Design Institute and finally a world class university to make our legacy felt in quality education in India. All this is impossible without the efforts of the students, faculty members, staff and alumni of The Heritage family who helped us to gain the hall of fame in the country.

H.K. Chaudhary
